WorkWize LMS

Closed Loop Compliance Training

Keeping employees compliant with legislation like GDPR and Modern Slavery or even Basic Health & Safety, is a challenge.

As a Learning Management System that provides compliance assurance, WorkWize LMS is in a class of its own.

Compliance Dashboard - Drill down quickly to identify non-compliant teams, offices or individuals. Effectively highlight compliance gaps to senior and line management

Fully Automate Training - Automatically enrol and re-enrol staff on courses and policies relevant to them with our unique Closed Loop Compliance system. Track ILT alongside eLearning

Policy Distribution & Sign-off - Stay in step with HR and demonstrate a robust policy compliance audit trail across the whole organisation

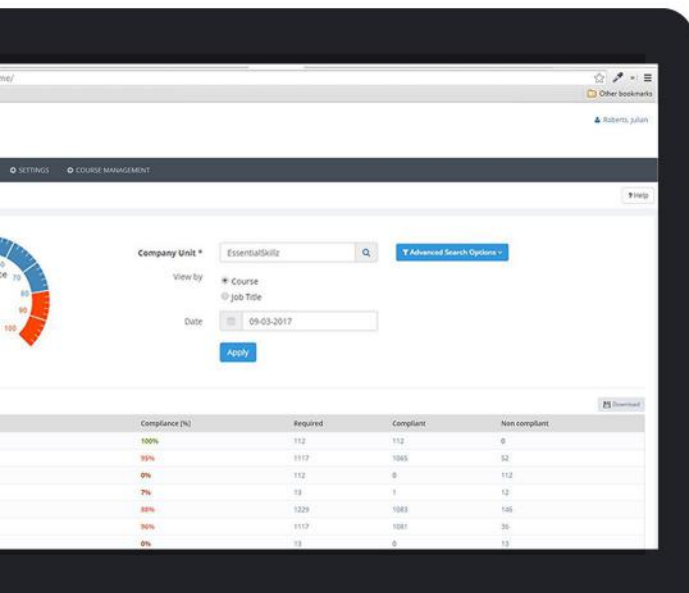

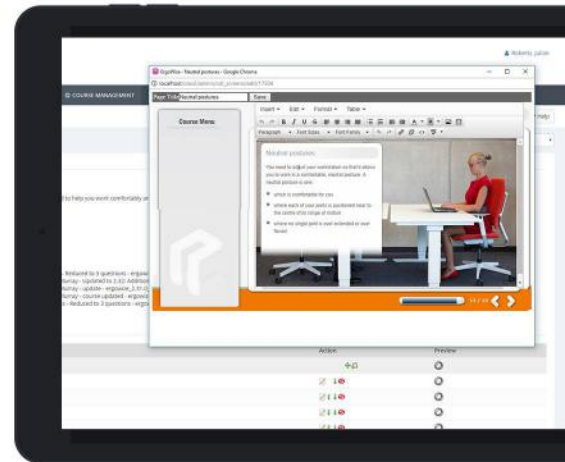

Configurable Reporting - Comprehensive dynamic reporting suite including KPI reports

Roll out People Based Risk Assessments - Measure and manage workplace risk on subjects such as Display Screen Equipment and Driving

Easy to use course editor and SCORM compliant Rapid Authoring Tool - Create your own courses or edit courses from our library in minutes and publish directly into WorkWize LMS

Archiving and Version control - Track changes made to courses with full version control

Integrations - Integrate with your HR or Payroll System to automate user management

Your LMS

Already have an LMS?

Integrate our key tools with your existing system

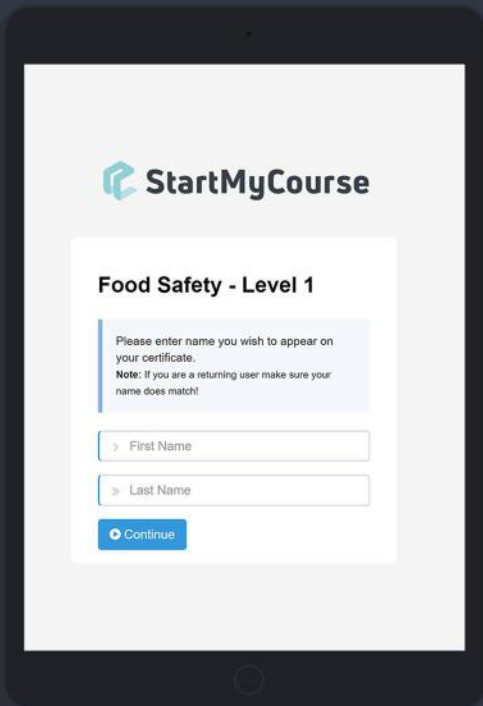

StartMyCourse:

The No Username LS - *Taking the Management out of an LMS*

No Username. Instant Deployment. Instant Access.

Extend the reach of your existing LMS to hard to reach groups. Avoid the pitfalls of trying to mix self-registration with clean employee data inside your core system. Open your eLearning to suppliers, partners or community projects.

Case Study

A major buying group behind an International Food Franchise wanted to enhance the take up of Food Safety training amongst its Franchisees. The staff include a high percentage of students and other short-term workers. The high staff turnover and the fact that employees are contracted to the franchisees, meant a centrally administrated system was not going to work.

Solution

A simple internet portal with the StartMyCourse engine behind it meant all the franchises could distribute the training links directly to their local staff, free at the point of use, with no need for setting up accounts, usernames or passwords.

96% of the course completion target has been achieved in less than 6 months

8500 courses have been distributed to learners with instant access to the training

Do you have an eLearning Project focused on hard to reach groups?
